Consultancy Work

COMBUILITA	VOI WORK

WIP	Intelligent Transportation System Consulting Gave consulting, traffic study, and seminar for traffic and transport economics in a city with more
	than one million population in the Philippines. Study postponed because of pandemic.
WIP	Marawi City Study
шил	Commissioned for bases conversion and development. Performed barangay population projection, land use projection, traffic modeling, and social services demand projection. Study used inverse distance weighting to interpolate missing data, then used spatiotemporal Random Forest for projections. Bayesian age-cohort-population modeling also performed, but results were not used.
WIP	Firm Manhours and Utilization Analysis
WIP	Estimated a machine learning model for a consulting firm that linked manhours and utilization to psychological metrics. Soil Ph Level Randomized Control Trial
	Gave consulting on study design for a randomized control trial to see impact of banana peel vinegar on soil Ph level. Analyzed data collected to assess impact.
2022 / 10	Larval Toxicology Randomized Control Trial
2022/10	Analyzed data collected from two Randomized Control Trials studying the effect of a pesticide and a drug cocktail on two samples of insect larvae. Survival analysis for Osteosarcoma
2022 / 10	Performed survival analysis using Competing Risk regression and Cox Proportional Hazards regression on Osteosarcoma data. Estimated Farrell's C index to determine which surgical staging classification to use.
WIP	Degree Centrality and Prestige Social Network Analysis
2022/06–10	Gave consulting on study design. Client aborted study because from personal reasons. Study involved estimating degree centrality and degree prestige, and statistical modeling using these metrics.
2022/09	Sustainability Reporting and Corporate Financial Performance Performed hierarchical model analysis on sustainability indicators' impact on corporate financial per-
2022/09	formance with random slopes and intercepts. COVID Vaccine and Mutation Interaction Study
	Performed an interaction study on the effects of each COVID vaccine on the number of mutations in each COVID variant. Found that mRNA vaccines have significantly more mutations than competing vaccine.
2022/09	IMU Accelerometer Signal Processing
	Performed signal processing in Python on linear acceleration data using Butterworth Filter and Fast Fourier Transform to obtain tremor data. Successfully decomposed and denoised data to see tremor levels.
2022/08	Spatiotemporal Data Analysis
2022 / 02	Analyzed spatiotemporal data using geoR and STARMA packages in R. Achieved good accuracy in test data.
2022/08	Medical Device Equivalence Testing Gave statistical consulting on sample size estimation for novel medical device equivalence testing.
2022/05	Sustainability Reporting Consulting
2022/05	Gave statistical consulting on sustainability indicators' impact on corporate financial performance. Dividend Payout Statistical Modeling
2021/11	Performed panel data analysis on factors affecting dividend payout policies among companies in ASEAN, comparing pooling, fixed effects, and random effects models. Also performed panel variable coefficient modelling for each country. Population and Chattel Slavery Prevalence
2021/10	Gave statistical consulting and performed analysis of population impact on chattel slavery prevelance, along with temporal-spatial effects. Illiquid Assets Pricing Model
2021,10	Implemented a Geometric Brownian Motion model in Python that estimated illiquid asset volatility and correlation with liquid asset, then performed price simulation using estimated results. Model came from Ang, Papanikolaou, and Westerfield (2014), and required applying Ito's Lemma to obtain a formula for use with Monte Carlo Integration. Said asset was cryptocurrency with token lockups, requiring illiquid asset analysis. Returns distribution also had fat-tailedness, requiring use of Laplacian Distribution in Monte Carlo. Model obtained 97% accuracy in backtesting.

2021/10	Forecasting weekly Sales volumes Fransactional Data
2021/02	Implemented a Multilayer Perceptron for forecasting product sales volumes using transactional cashier data, and performed correlation analysis for first-differenced sales and pricing data. Discovered that sales for different product groups would rise by more than 180% for all groups but one, both target countries, and one target channel, and that two goods violated the Law of Demand.
2021/09	Prey Processing Bout Longitudinal Analysis
	Performed longitudinal data analysis on shark prey-processing behavior using standard econometric tools for time series and panel data.
2021/08	State Space Model using Kalman Filter for Macroeconomic Forecasting
	Performed a novel implementation for Kalman filter for credit and macroeconomic data using Python. This implementation was required for analysis of panel data with exogenous control variables with Kalman filtering.
2021/07	Bayesian Distance Clustering in R
	Implemented a Bayesian Distance Clustering algorithm in R. This implementation required novel code for Hamiltonian Monte Carlo with tensor objects.
2021/06	Traffic forecasting in Software Defined Networking using Deep Learning
	Performed classification analysis to forecast traffic flowing to Network Protocols.
2021/05	Classification Model for Shark Behavior
	Performed classification modeling on longitudinal data for shark behavior, with corrections for auto-correlation and multicollinearity.
2021/04	Uncorrelated Capital Asset Pricing Estimation for Multiasset Portfolio
	Estimated a Capital Asset Pricing Model for a panel of assets with uncorrelated alpha and beta.
2020 / 10	Cafe Aghora Sales Consultancy
	Gave consultation for a data science team which analyzed optimal days for sales from Cafe Aghora in Bacolod City.
2020 / 10	Sta Rita Orphanage Data Engineering
	Gave consultation for a data science team which performed data engineering for Sta Rita Orphanage in Parañaque City.
2020/07	Alabel Municipal Hall Feasibility Study
	Prepared a feasibility study on the new municipal hall of Alabel, Sarangani.
2020/05	Outlook on Feeds and Grain Market
	Prepared an outlook analysis on the domestic markets for feeds and grains.
2020/01	Hotel Feasibility Study
	Estimated projected profits using quantitative methods on visitor, revenue, and geospatial data.
2020/01	Employee Turnover Analysis
	Crafted a survey to record key variables and performed statistical analysis to determine which variables affected the probability of turnover.
2019/11	Firm Profitability Analysis
	Obtained company time-series data on employee productivity and performed market research to determine their effects on the company's profits.

Working Papers

EMPIRICAL

2022/02	Expansionary Credit, Easy Money, and Boom-bust Cycles,
	1868-1970
MSR Working Paper Series	Analyzed long-run and causal effects of expansionary credit on American business cycles.
2021/05	Developing a Provincial Destination Choice Model of the Philip-
	pines
MSR Working Paper Series	Developed a model assigning weights to factors affecting domestic traveller choice of provincial destination in the Philippines.
2021/05	Historical Climate Factors and Rice Prices in the Philippines
MSR Working Paper Series	A paper analyzing how rice prices in the Philippines have responded to historical climate factors.

Case Studies

TRANSPORTATION

2019/03	Route Assignment for Travel between Metro Manila Central Business Districts
	Determined optimal route assignments for travelers between Makati, Ortigas, and Bonifacio Global
	City using linear programming methods.
2018/12	Mode Choice Analysis of New York City
	Undertook mode choice analysis of passenger behavior in New York City using 2017 data.
2018/08	Estimation of the Lane–Mile Elasticity of Metro Manila Traffic
	Estimated the magnitude of effect of road size and expansions on traffic in Metro Manila in the Philippines using linear regression methods.

Miscellaneous

2019/03 | Is the Filipino Worker Ready for Industry 4.0? An Empirical Analysis

Performed classification analysis of factors predisposing the Filipino labor market to choices of occupation.

Courses Taught

M&S RESEARCH HUB

Applied Econometrics

A program for training in Econometric Theory.

Progmetrics

A program for training in practical Econometrics using \boldsymbol{R} and Python.

Introductory Machine Learning Theory and Practice

Intensive training on the fundamentals of Machine Learning for econometric modeling and data analysis using Julia.

Bayesian Inference for Data Science and Research

Introductory training for Bayesian inference theory and applications to statistical inference and regression analysis.

Theoretical Foundations of CGE Modelling

Training for Computable General Equilibrium models with GAMS.

Recommended course by the GAMS Institute.

Bayesian SVAR and Regime Switching Models Using R and Stata

Special training for the theory and practice of Structural Vector Autoregressions, Bayesian Inference, and Regime Switching Models with R and Stata.

Positions Held

2020/03-Present	Chief Statistician, DATSTAT Consulting
	Balibago, Angeles, Philippines
2020/11-2022/02	Academic Council, M&S Research Hub
	Kassel, Germany
2019/08-Present	Chief Analytics Officer, ACOng Consulting Inc
	Makati, Philippines

SOFTWARE DEVELOPMENT

2021/11	MultiDistBrownian Motion
	Developed a Python Package for Brownian Motion Simulations for Liquid and Illiquid Financial Assets, with options for non-Normal Probability Distributions.
2021/09	Panel Kalman Filter
	Developed a Python Package for Kalman Filtering of Panel Data.

SEMINARS ATTENDED

 $2021/03 \mid The\ Linear\ Probability\ Model\ and\ Its\ Discontents$ by Andrew Pua

FORMATION

2024/06 | Master of Science in Mathematics (in-progress)

Open University, United Kingdom

2019/12 Bachelor of Science in Applied Economics, Major in Industrial Economics

De La Salle University, Philippines

Thesis: "Developing a Provincial Destination Choice Model of the Philippines"

Advisor: Lawrence B. Dacuycuy

cGPA: 3.193/4.0

Languages

English: Mother Tongue

TAGALOG: Fluent KAPAMPANGAN: Fluent

Latin: Ecclesiastical Usage

Programming Languages

Intermediate: Python, R, Julia, C#, L*TEX, HTML, CSS Software Packages: Statsmodels, PYMC3, Sckit-Learn, Theano

Operating Systems Used: Ubuntu, Manjaro, ArtixLinux Other Software Used: SageMath, Stata, GAMS, OnlyOffice

Interests and Activities

Concentratios: Mathematics, Statistics, Economics

Main Fields: Probability Theory, Stochastic Processes, Regression Analysis, Transportation

Research, Decision Theory

Hobbies: Aristotelian Philosophy, Medieval Social and Economic History

YouTube Channel: VIATORINTERRA
